   - 2.4. A heifer which doesn't calve on or before 39 months, will not be allowed to be showed.

   - 2.7. Judges must be made aware by the ring steward at the beginning of each class of any extremes (highest 5% of breed) in 600 days and/or MCW. The Judge will be allowed to use his own discretion in applying this rule. *(Symposium and annual meeting decisions)*

3. **BULLS**

The goal is to use shows to promote genetic improvement for economic important characteristics. All bulls on shows with estimated breeding values between the age of 12-36 months qualify. There must be at least 10 bulls per breed to qualify. The visual assessment counts 50% of the final score and the level of record keeping as well as performance data count 50%. Standard criteria for all breeds are used to assess the breeding values (birth, weaning, year, final and mature cow weight and scrotum circum-ference), although some breeds prefer to use economic selection indices. The criteria were compiled by experts at the University of the Free State together with the organisers. The winner within the breed competes with similar winners at other shows after which a national winner within the breed is announced at the Aldam Stockmanschool.
